

## Farmaquick — Sales Email

**Subject line:** Matías, what if you could skip the pharmacy line forever?

Hello Matías,

As a fellow entrepreneur, I know how packed your days can get, meetings, deadlines, family, everything at once. That's exactly why we built Farmaquick: to give you one less line to wait in.

At Farmaquick, we're redefining what a pharmacy can be. We make getting your health essentials as quick as grabbing your phone. Local professionals are already using Scan & Go to save up to 10 minutes per visit.

With our Scan & Done system, you can:

- Use your smartphone to scan products as you shop.
- Pay directly in the app — no cashier, no waiting.
- Confirm your purchase with a quick QR scan and head out, no checkout line

needed.

It's pharmacy made simple: no friction, no wasted time, just convenience that keeps up with your pace. Farmaquick helps you feel better in minutes, not hours.

When I started Farmaquick, I wanted to make healthcare as agile as our lifestyles, blending technology and care in a way that actually respects people's time. I'd love for you to try it and tell me what you think.

Does this sound interesting? Visit our store and 🖱️ Try Scan & Go now: [Download Scan & Done](#) today and experience health at the speed of life.

Warmly,

Tatiana [Selma](#)
